PRIMARY SERVICE OFFERINGS

How agencies engage us

Operational Execution

Strategy design, process reengineering & organizational transformation, closing the gap between mandated mission and daily execution. We give our teammates and clients a trusted, low-overhead partner that can step in, take ownership, and provide the execution capacity and accountability needed to deliver mission requirements.

70% of transformation initiatives fail. We make sure yours doesn't.

Strategic Technology & AI Solutions

We help agencies turn AI and data opportunities into practical, working solutions, from initial concept through implementation and deployment, with the processes, tools, and knowledge needed for long-term operation and sustainment after the engagement has ended.

80% of IT budgets fund legacy systems. We invest in what moves the mission.

Program & Contract Management

We manage the people, budgets, day-to-day tasks, and contract requirements needed to keep a program on track. That includes getting qualified people in place, managing clearances and government equipment, following contract requirements, rapid execution of tasks, and smooth transition in and out of contracts.

AI-enabled program execution.

WHAT SETS US APART

Big-firm depth. Small-business accountability.

Senior Practitioners, Every Engagement

Building upon our experience leading 100+ government projects and programs, we staff each project with 20+ years seasoned professionals running operations on the ground and shoulder-to-shoulder with our clients.

We Execute, Not Just Advise

Whether we deployed AI Ops at the IRS at scale, improved collections operations by \$500M, 10X'd automation for manual processes, or executed strategic plans for transit authorities, we delivered results, not just decks. Execution is what we do.

AI-Ready, Data-Driven, Mission-Focused

We put AI and data to work for better mission outcomes. Building on our experience delivering unique data analytics solutions and establishing trust in data, we apply streamlined technology to improve decisions, increase capacity, and deliver immediate impact.

Accountability for Outcomes

We help agencies unlock mission capacity by improving how work gets executed, without unnecessary overhead, right-sized teams, and talent matched to the scope. Results consistently outperform expectations, on time and on budget.

"Big-firm strategic depth. Small-business accountability. A bias toward quick wins, not long, drawn-out analysis."

CORE CAPABILITIES

What we bring to every engagement

Mission Strategy & Roadmap Development

- Mission-aligned strategic plans, actionable roadmaps, implementation sequencing
- Annual strategy refresh cycles and performance measures development
- Gap assessment & investment planning

Implementation, Adoption & Operational Readiness

- Pilot-to-production delivery, launch readiness, and scaled roll-out support
- Change management & process readiness
- Integration testing & go-live execution

Process Design & Optimization

- Current state assessment, future state design & gap assessment
- Process improvement and workflow automation

Data Analytics & Decision Intelligence

- Advanced analytics, forecasting, and actionable insights
- Executive dashboards, performance analytics, visualization and decision support
- Data strategy & governance

AI & Automation Solutions

- AI strategy & use case prioritization
- Intelligent automation, RPA & AI-enabled workflow deployment
- Machine learning solution design, model validation & monitoring

Contract Execution & Program Delivery

- Workforce planning, team leadership, resource management, and performance reporting
- Federal & State contract lifecycle management
- Program & risk management

SELECT PAST PERFORMANCE

We don't deliver reports. We deliver outcomes.

Agency / Program	Capability Delivered	Result
IRS / Treasury	AI for Operations (AIOps)	AI-powered infrastructure monitoring & autonomous incident remediation at scale
U.S. SEC	Post-Crisis Operational Review	10+ performance recommendations addressing efficiency after the 2008 financial crisis
MA State / HHS	Statewide Technology Rollout	20-member team coordinated rollout across 2,000+ HHS provider organizations
IRS / Treasury	Predictive Analytics & Risk Modeling	\$500M+ in improved collections via ML-driven case scoring & enforcement prioritization
State/Local — NY MTA	Long-Range Strategic Plan	5-year vision & strategic plan impacting 1.5B annual riders
IRS / Treasury	Enterprise Cloud Migration	100-person PMO migrated 100+ apps to a modern container platform, on cost & schedule
Treasury	Fraud Detection Strategy	Complete fraud detection strategy for a new health insurance marketplace program
Department of Homeland Security (DHS) / CISA	Wireless Network Coordination	Cybersecurity and interoperability, enabling integrated systems to provide backup communications for disaster recovery for national security.
Consumer Trust and Policy	Enterprise Trust Framework	10+ trust frameworks adopted across product and analytics teams company-wide to define, centralize and measure user trust across disparate product lines
